Kruzer is M&R’s most affordable entry-level manual screen printing press. Built with M&R’s rugged construction and innovative design, Kruzer includes numerous proven design features, including tapered-roller-bearing-supported upper and lower carousels, a precise micro-registration system, machined center shaft, and three-point pallet leveling system. Kruzer’s unique lever-adjusted off-contact system operates vertically, eliminating the need for a separate angle adjustment. Kruzer is offered in a 6-color/4-station model, and it’s designed to fit through a 78 cm (31”) doorway when disassembled. Side screen holders and solid aluminum, low-profile, rubber-coated pallets are standard.

M&R’s System Integration design allows Kruzer to integrate seamlessly with the easy-to-use Tri-Loc Rapid Registration System, the industry’s most efficient way to set up and register screens on both manual and automatic screen printing presses. Kruzer’s maximum screen width—58 cm (23”)—also fits most automatic presses. Kruzer delivers unprecedented quality, performance, and value in a manual press.

It’s ideal for startup screen printing shops and for small and mid-size automatic screen printing shops in need of an exceptionally affordable high-quality manual screen printing press for sampling and small runs. Kruzer ships disassembled and boxed for onsite assembly, but can be ordered fully assembled and crated (additional charges apply).

SAVE on Kruzer Self-Assembly
Order Kruzer disassembled and save on the purchase price, crating, and shipping. And assembly is unbelievably fast, especially with the help of M&R’s comprehensive assembly video. The press can be assembled by one person, though it’s easier with two. And the fastest recorded assembly time by two screen printers—who had never seen a Kruzer before—is an impressive 37 minutes. And almost any two people with a basic knowledge of hand tools (hex wrenches, crescent wrenches and hammer) should be able to assemble the press in well under two hours. Kruzer assembly is a great way to get great savings on a great press.

**Standard Features**

**Design & Construction**
- Designed & disassembled to fit through a 78 cm (31”) doorway
- Heavy-duty tapered roller bearings
- Machine-tooled and polished center shaft

**Pallet System**
- Precise three-point pallet leveling system
- Tool-free quick release pallet locks

**Pallets**
- Solid-aluminum, low-profile, rubber-coated screen printing pallets
- Standard sizes are interchangeable with M&R automatic screen printing presses

**Registration**
- Compatible with M&R’s Tri-Loc® Rapid Registration System
- Hardened steel roller registration bearings provide excellent performance and durability
- Lever-adjusted off-contact system
- Micro-registration with zero set point guides
- V-Guide locator system

**Screen Clamps & Holders**
- Accommodate most frame types and manage screen sizes up to 58 cm (23”) wide
- Side clamps are fully adjustable, simplify roller frame use, and accommodate a wide range of screen sizes

**Spring Tension System**
- Enclosed spring system accommodates a wide variety of screen types, sizes, and weights

**Options**

**Jacket Hold-down Pallet**
- Simplifies screen printing lined jackets, reversible/double layer mesh-type jerseys, and other multi-layer garments

**Pallets**
- M&R aluminum pallets and platens come in a wide range of sizes and styles
