

## Industrial High-Speed DTG Printing System

*Dual quick-load  
fast-indexing pallets*

*Built-in heat presses flatten  
fibers and heat garment  
surfaces prior to printing*

The Maverick™ exemplifies M&R's commitment to future technologies in the garment decoration process. With an emphasis on print quality and speed, M&R set out to build a leading-class, industrial-grade DTG printer.

Featuring a dual-shuttling platform that allows independent pallet shuttling based on the operator's needs, the Maverick can print images one-off or as multiple copies, and produce them in an array of shirt color combinations. Two digitally-controlled heat presses use air cylinders to flatten garment fibers and heat the surface prior to printing.

With fast print speeds, expanded color gamut and rugged construction, the Maverick is designed and manufactured with the same commitment to quality and exacting standards that has made M&R an industry leader for over 30 years.

## FEATURES

- High-speed DTG prints with a 6-color-plus-white expanded color gamut
- Proprietary RIP software gives complete print parameter control and image costing
- In-tank agitators and recirculation systems keep inks at peak performance at all times
- Dual-printhead IR heaters speed up the printing/curing process
- Closed-cell rubber top quick-load pallets eliminate the need for spray tack
