(sold separately)

M&R's TWISTER™ provides powerful, convenient garment cooling action at the outfeed end of your M&R conveyor dryer!

TWISTER combines multiple fans, a speed control and an air filtration system to consistently cool down garments as they exit your M&R conveyor dryer. TWISTER's cooling power helps avoid image "blocking" or "offsetting" that can be caused by hot garments falling into a box or pile. This cooling power also makes garment-handling more comfortable and convenient for personnel catching/handling shirts as they exit your dryer's outfeed.

Designed to integrate seamlessly with M&R conveyor dryers, TWISTER is a boon to convenience and shop efficiency.

FEATURES

- Reduces garment temperature after curing for easier garment handling
- Easy to add to most M&R electric/gas dryers
- Convenient fan speed control
- Available in 36", 48", 60" and 72" widths
