MATERIAL SAFETY DATA SHEET

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: ARTISTRI® D2540 BLACK DISPERSE DYE INK
Product Use: Ink-Jet Printing Cartridge

Company Identification

MANUFACTURER/DISTRIBUTOR
DuPont Ink Jet and Specialty Colorants
DuPont Performance Coatings
Barley Mill Plaza
Wilmington, DE (USA)

PHONE NUMBERS
Product, Safety, Health and
Environmental Information : 1-302-695-9682 (8 a.m.-5 p.m. ET, M-F, U.S.A)
Transport Emergency : CHEMTREC: 1-800-424-9300 (24 hours, U.S.A)
Medical Emergency : 1-800-441-3637 (24 hours, U.S.A.)

*Disclosure as a toxic chemical is required under Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR part 372.

Components (Remarks)

**The specific identity for each component not identified by a CAS Registry Number is withheld as a trade secret.
3. HAZARDS IDENTIFICATION

Potential Health Effects

THIS PRODUCT CAN BE USED SAFELY WHEN USED AS DIRECTED AND WHEN APPLICABLE SAFETY PRECAUTIONS ARE FOLLOWED.

POTENTIAL HEALTH EFFECTS FROM PRODUCT

Potential routes of overexposure to this product are skin contact, eye contact and inhalation of vapor.

Ingestion is not expected to be a significant route of exposure for this product under normal use conditions.

There is no toxicity data available for this specific formulation. Any potential hazards are presumed to be due to exposure to the components.

ADDITIONAL HEALTH EFFECTS

Since this mixture has not been tested as a whole to determine the hazards by all routes of exposure, information is provided for each hazardous component of the mixture to meet requirements of OSHA's Hazard Communication Standard (29 CFR 1910.1200). The effects noted occur from exposure to the pure component unless otherwise noted.

INFORMATION FOR COMPONENTS

ETHYLENE GLYCOL

Eye Contact - May cause slight transient (temporary) eye irritation. Corneal injury is unlikely. Vapors or mists may cause eye irritation.

Skin Contact - Essentially nonirritating to skin. Repeated skin exposure to large quantities may result in absorption of harmful amounts.

Inhalation - At room temperature, exposure to vapors are minimal due to physical properties; higher temperatures may generate vapor levels sufficient to cause adverse effects.

Ingestion - Single dose oral toxicity is considered to be moderate. Excessive exposure may cause central nervous system effects, cardiopulmonary effects (metabolic acidosis), and kidney failure. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; however, swallowing amounts larger than that may cause serious injury, even death.

Systemic (Other Target Organ) Effects - Excessive exposure may cause irritation to upper respiratory tract. Observations in animals include kidney and lever effects and deposition of calcium salts in various tissues after long-term dietary intake of ethylene glycol.

Cancer Information - Ethylene glycol did not cause cancer in long-term animal studies.
Teratology (Birth Defects) - Based on animal studies, ingestion of very large amounts of ethylene glycol appears to be the major and possibly only route of exposure to produce birth defects. Exposures by inhalation (tested nose-only in animals to prevent ingestion) or skin contact, the primary routes of occupational exposure, had minimal or essentially no effect on the fetus.

Reproductive Effects - Ingestion of large amounts of ethylene glycol has been shown to interfere with reproduction in animals. Specifically, growth retardation and decreased litter size in rats and mice and mating frequency in mice were observed.

DIPROPYLENE GLYCOL METHYL ETHER

Eye Contact - May cause slight transient (temporary) eye irritation. Corneal injury is unlikely.

Skin Contact - Prolonged exposure not likely to cause significant skin irritation. Prolonged skin contact with very large amounts may cause drowsiness.

Ingestion - Single dose oral toxicity is considered to be extremely low. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amounts larger than that may cause injury.

Inhalation - Excessive exposure may cause irritation to upper respiratory tract. Signs and symptoms of excessive exposure may be anesthetic or narcotic effects.

Systemic (Other Target Organ) Effects - Observations in animals include minor liver or kidney effects. Signs and symptoms of excessive exposure may be anesthetic or narcotic effects.

Teratology (Birth Defects) - Birth defects are unlikely. Exposure having no adverse effects on the mother should have no effect on the fetus.

HUMECTANT

Eye Contact - May cause slight transient (temporary) eye irritation. Corneal injury is unlikely.

Skin Contact - Prolonged or repeated exposure not likely to cause significant skin irritation. A single prolonged exposure is not likely to result in the material being absorbed through the skin in harmful amounts.

Inhalation - At room temperature, vapors are minimal due to physical properties. If heated or sprayed as an aerosol, airborne material may cause upper respiratory irritation.

Ingestion - Single dose oral toxicity is considered to be extremely low. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amount larger than that may cause injury. Signs and symptoms of excessive exposure may be central nervous system effects and increased blood sugar levels.

Systemic (Other Target Organ) Effects - Repeated excessive exposure may cause increased fat levels in blood. Observations in animals include kidney, liver, and gastrointestinal effects with very large oral doses.

Cancer Information - Did not cause cancer in long-term animal studies.
Teratology - Birth defects are unlikely. Exposures having no adverse effects on the mother should have no effect on the fetus.

Reproductive Effects - Reproductive effects seen in female animals are believed to be due to altered nutritional status resulting from extremely high doses in their diets. Similar effects have been seen in animals fed synthetic diets.

HUMECTANT

Eye Contact - May cause eye irritation.

Carcinogenicity Information

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

4. FIRST AID MEASURES

First Aid

INHALATION

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT

In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing. Consult a physician. Wash contaminated clothing before reuse.

EYE CONTACT

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

INGESTION

Ingestion is not an expected route of exposure during normal use of the product. If ingested, consult a physician.
5. **FIRE FIGHTING MEASURES**

Flammable Properties

- **Flash Point**: >93.3 °C (>200 °F)
- **Method**: Closed Cup
- **Approximate Flammable Limits in Air, % by Volume**
  - LEL: 3.2
  - UEL: 15.3
- **Autoignition Temperature**: 398 °C (748 °F)

Product is a nonflammable water-based solution.

Hazardous combustion products (gases/vapors) produced in fire can include carbon monoxide, carbon dioxide, nitrogen oxides and smoke.

**Extinguishing Media**

- Use media appropriate for surrounding material.

**Fire Fighting Instructions**

- This product is not flammable. Use normal firefighting procedures for the area.

6. **ACCIDENTAL RELEASE MEASURES**

**Safeguards (Personnel)**

**NOTE**: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

**Initial Containment**

- Dike spill.

**Spill Clean Up**

- Soak up with absorbent material.

7. **HANDLING AND STORAGE**

**Handling (Personnel)**

- Avoid contact with eyes, skin, or clothing.
8. **EXPOSURE CONTROLS/PERSOAL PROTECTION**

Personal Protective Equipment

**EYE/FACE PROTECTION**
Wear safety glasses. Wear coverall chemical splash goggles and face shield when the possibility exists for eye and face contact due to splashing or spraying of the material.

**RESPIRATORS**
Respirators are not needed for normal use.

**PROTECTIVE CLOTHING**
If there is potential for significant dermal contact wear appropriate impervious clothing and gloves.

**Applicable Exposure Limits and Exposure Data**

**WATER**
- PEL (OSHA): None Established
- TLV (ACGIH): None Established
- AEL * (DuPont): None Established
- LD$_{50}$ (rat, oral): >90 mL/kg (RTECS)
- LC$_{50}$ (rat, inhalation/4 hr.): No data available

**ETHYLENE GLYCOL**
- PEL (OSHA): None Established
- TLV (ACGIH): Ceiling: 100 mg/m$^3$, aerosol
- AEL * (DuPont): 50 ppm, 8 Hr. TWA, vapor
- IEL (2000/39/EC): 52 mg/m$^3$, 20 ppm, skin
  - STEL 104 mg/m$^3$, 40 ppm
- LD$_{50}$ (rat, oral): 4,700 mg/kg (RTECS)
- LD$_{50}$ (rabbit, dermal): 9,530 uL/kg (RTECS)
- LC$_{50}$ (rat, inhalation/4 hr.): >200 mg/m$^3$ (RTECS)

**DISPERSE DYES**
- PEL (OSHA): None Established
- TLV (ACGIH): None Established
- AEL * (DuPont): None Established
- LD$_{50}$ (rat, oral): No data available
- LC$_{50}$ (rat, inhalation/4 hr.): No data available

**DIPROPYLENE GLYCOL METHYL ETHER**
- PEL (OSHA): 100 ppm, 600 mg/m$^3$, 8 Hr. TWA, skin
- TLV (ACGIH): 100 ppm, 8 Hr. TWA, skin
- AEL * (DuPont): None Established
- IEL (2000/39/EC): 50 ppm, 308 mg/m$^3$, skin
- LD$_{50}$ (rat, oral): 5,350 mg/kg (supplier)
- LD$_{50}$ (rabbit, dermal): 9,500 mg/kg (supplier)
- LC$_{50}$ (rat, inhalation/4 hr.): No data available
9. PHYSICAL AND CHEMICAL PROPERTIES

Physical Data

Form : Liquid
Color : Black
Odor : Slight
Solubility in Water : Miscible
pH : About 8
Specific Gravity : About 1.1

Other Information

Flash Point : >93.3 °C (>200 °F)
Method : Closed Cup
Approximate Flammable Limits in Air, % by Volume
LEL : 3.2
UEL : 15.3
Autoignition Temperature : 398 °C (748 °F)

10. STABILITY AND REACTIVITY

Chemical Stability

Stable at normal temperatures and storage conditions.
Incompatibility with Other Materials

None reasonably foreseeable.

Decomposition

Decomposition does not occur during normal use.

Polymerization

Polymerization will not occur.

11. TOXICOLOGICAL INFORMATION

Skin Sensitization

The potential of this product to produce an allergic skin sensitization response has been evaluated in mice using the Local Lymph Node Assay (LLNA). Under the conditions of the study, this product did not produce a positive skin sensitization response.

Mutagenicity (alteration of genetic material)

When tested in a bacterial reverse mutation assay (Ames Assay) using five different strains of bacteria, this product produced a positive response in both the absence and presence of metabolizing enzymes. A dye used in this product has a structure quite similar to C.I. Disperse Blue 79:1 (3618-72-2) that has been found to be positive in a bacterial reverse mutation assay (Ames Assay). Mutagenicity testing with Chinese hamster cells and an in vivo micronucleus assay were negative with this similar dye.

12. ECOLOGICAL INFORMATION

Ecotoxicological Information

No data available for product.

13. DISPOSAL CONSIDERATIONS

Waste Disposal

DO NOT DISCARD INTO ANY SEWERS, INTO ANY BODY OF WATER, OR ON THE GROUND. Treatment, storage, transportation, and disposal must be in accordance with applicable Federal, State/Provincial, and Local laws and regulations.
14. TRANSPORTATION INFORMATION  
(Not meant to be all inclusive)  

DOT (Domestic Surface, U.S.A.) : Not regulated  
ICAO/IATA (Air) : Not regulated  
IMO/IMDG (Ocean) : Not regulated  

15. REGULATORY INFORMATION  
(Not meant to be all inclusive - selected regulations represented)  

U.S. Regulations  

Federal Regulations  

TSCA Inventory Status - All components of this product are listed, or exempt from listing, on the TSCA 8(b) chemical inventory.  

TSCA Section 12(b) Export Notification - This product can contain:  

- Dipropylene glycol methyl ether (34590-94-8) 1-10%  
- Tetrahydrofuran (109-99-9) <0.1%  

State Regulations  

State Right-To-Know  

WARNING - SUBSTANCES KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM (California Proposition 65)  

- Ethylene Oxide (75-21-8) <0.5 ppm  

The above are trace impurities that can occur in the product.  

Canada  

Canadian Environmental Protection Act (CEPA) - All components of this product are listed on the Canadian Domestic Substances List (DSL) or have been notified.  

WHMIS Hazard Classification - The Canadian Workplace Hazardous Materials Information System (WHMIS) classification for this product is:  

- Ink cartridge - Exempt (Manufactured Article)
This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

**European Union Regulations**

EU Inventory Status - All components of this product are listed, or are exempt from listing, on the EINECS chemical inventory.

Transport Information - This product is not classified as dangerous within the meaning of transport regulations.

Labeling - This product does not need to be labeled in accordance with EC-Directive 1999/45/EC.

Restrictions of Certain Azo Dyes - The dyes used in this ink are not subject to the German Consumer Goods Ordinance that bans certain azo dyes, and articles dyed with them, or the EU 19th Amendment (Directive 2002/61/EC) of Council Directive 76/769/EEC relating to restrictions on the marketing and use of certain dangerous substances and preparations (azocolourants).

**Switzerland**

Switzerland VOC Regulations (Ordinance 814.018, Verordnung über die Lenkungsabgabe auf flüchtigen organischen Verbindungen, as of 28 December 2000)

This product is exempt from Swiss VOC regulations.
